PROJECTS

Guess the Number Gaming App – AWS EKS

Tools: *Python, Flask, Docker, Kubernetes, Amazon EKS, ECR, EC2, VPC, IAM, Helm, Application Load Balancer (ALB)*

- Developed a Python Flask-based number guessing game and containerized the application using Docker.
- Built and pushed the Docker image to Amazon ECR for high-availability deployment.
- Configured AWS VPC networking with public and private subnets, Internet Gateway, NAT Gateway, and custom route tables.
- Deployed on Amazon EKS using Kubernetes manifests with a Deployment configured for two replicas and a NodePort Service.
- Configured Kubernetes Ingress and integrated OIDC, IAM, and Helm to install the AWS Load Balancer Controller.
- Exposed the application through an internet-facing Application Load Balancer; managed the cluster from an EC2 instance using AWS CLI, kubectl, eksctl, and Helm.
